

# Advancing Integral Projection Models with New Computational Tools and Sources of Data

## Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>ipmr: an R package to flexibly implement Integral Projection Models</b>	<b>1</b>
<b>3</b>	<b>PADRINO and Rpadrino: a toolkit for rebuilding and analyzing published Integral Projection Models</b>	<b>1</b>
<b>4</b>	<b>How climate change will alter the threat of invasive species: a case study with the <i>Carpobrotus</i> genus</b>	<b>1</b>
<b>5</b>	<b>Discussion</b>	<b>1</b>

## 1 Introduction

blah blah blah

## 2 ipmr: an R package to flexibly implement Integral Projection Models

blah blah blah

## 3 PADRINO and Rpadrino: a toolkit for rebuilding and analyzing published Integral Projection Models

Blah blah blah

## 4 How climate change will alter the threat of invasive species: a case study with the *Carpobrotus* genus

## 5 Discussion
